Applicant: Innogel (as pronounced) AG

Title of the Invention: Preparation of Shaped Article based on Starch Gel

Claims:

1. A method for preparing a shaped article based on starch, characterized by preparing the gel separately by homocrystallizing and/or heterocrystallizing from the mixture of at least one base starch and at least one network-structure forming starch.

In the Specification:

Multi-layer soft capsule may be prepared by using carrageenan

A softening agent such a glycellol, polysaccharide may be used.
